**Only time-locked stakings entitle you to obtain such discounts**

\* For example, our partner pays 5% for each transaction.  
This means they are receiving a discount of 6% from this 5%, which is equal to  $0.06 \times 5 = 0.3\%$ .  
Therefore, the effective rate they are paying is  $5\% - 0.3\% = 4.7\%$
